

Workshops

The Butterfly fx workshops are devised to be fun and educational.

Fun with FX

See yourself 'Fly like Superman', 'Be a Fairy' or a Zombie. Perform live against a green screen and be transported as if by magic to another world. Great fun for the young and the young at heart!

Drama with Green Screen

A more in-depth performance workshop. Participants can take part in historical re-enactments or perform drama scenes that will form a narrative film. Dress up in costume and with minimal props can be set anywhere, anytime, such as back in the wild west, a medieval castle or aboard a ship!

Digital Animation

Animate your digital images to tell a story, using Photoshop and After Effects. Images can be made by using craft materials, drawn by hand or digitally.

Interviewing Skills

How to explore an issue or record oral history. Participants will learn how to approach a story, develop questions and practice good interviewing techniques. Training given in how to use video and sound recording equipment to achieve the best results. Good for a community group or person wanting to make a factual film.

Camera Recording Skills

Gain hands-on experience using digital video cameras. Training given in setting up with a tripod, lighting, sound, exposure and creative compositions.

Editing

Participants will be shown how to edit using digital non-linear software. They will be given an overview of how to assemble in a time line, choose cuts and transitions and make creative editing choices.

We can tailor workshops and training sessions to meet particular needs. Sessions can be for one day or part of a project.
